***Indonesian Academy of Sciences (AIPI)***

Supported by  
***InterAcademy Partnership (IAP)***  
***Academy of the Social Sciences in Australia (ASSA)***

---

### **BACKGROUND OF WEBINAR**

Scholarly communication is central to the academic endeavour. Scientific inquiry depends upon critical communication among researchers and the transmission of ideas among academic institutions. Present technology and global internet communication have enhanced the possibilities of scholarly communication beyond comprehension, and in the process, this spectacular enhancement has made scholarly communication one of the most complex and contentious issues in academia today.

The prestige of established publishing and the rankings of universities whose members depend on recognized sources of publication still affect the institute budgets, collaboration and publication of e Berlin Open Access Conference. This plan mandates scientists and researchers whose work was state-funded to publish their results in open repositories and journals. That issues involved in scholarly communication have come to the fore for considered and substantial discussion of these issues and their complications.

The Indonesian Academy of Sciences (AIPI) under the collaboration with AASSA, and supported by IAP and ASSA, arrange this Webinar that invites academies and institutions concerned with the issues to join an **International Webinar on Digital Scholarly Communication**. Given widespread and growing concerns for the general theme, we have designed a program consisting of a series of three events scheduled for **31 March, 28 April and 19 May 2021** when the above issue will be discussed in light of current international debates and to explore them in relation to specific national and regional concerns.

## THEMES OF WEBINAR SERIES

### Three Sub-themes of the Digital Scholarly Communication Webinar:

1. **31 March 2021:**  
Regional Patterns of Digital Scholarly Communication and Publications
2. **28 April 2021:**  
Access to Digital Scholarly Publications: Strategies, Applications and Impacts
3. **19 May 2021:**  
Publication and Dissemination of Digital Scholarly Communication

## PARTICIPATORY

We cordially invite participants (academicians, regulators, researchers, librarians, general interest, government officers, etc.) interested in joining this Webinar, and to contribute to this International Webinar in accordance with the theme, through Zoom application and Youtube access.
